Empathize & Discover

Project – IOT based safety gadget for Child Safety monitoring and notification

TEAM ID : PNT2022TMID37595

Think & feel

Is it really effective?

How does it notify?

How it is monitored?

Easy monitoring in their absence

Hear

Locate the child location

Monitoring their activities

Notify them if something is wrong

Don't need of caretaker

See

Only a message notification

monitoring not provided when mobile is switched off

Only location is sent

Does not alert when something goes wrong

Say & Do

Activities of child to be monitored

Regular updates of the child activities

Tracking child location

Alert when something goes worng

Pain:
Difficult to track their location if GPS signal is lost

Gain:
Easy to monitor child withouta caretaker
